

Real-time, Interoperable B2B Payments

Automating entire Procure to Pay (P2P) and Order to Cash (O2C) payment processing lifecycles

Accounts Receivable (A/R) and Accounts Payable (A/P) functions are critical to managing cash flows and are the lifeblood of all businesses. Haball's solution enables corporates to receive payments digitally and instantly.

What is Blink?

Blink is an interoperable, open-loop payment gateway that enables corporates to send and receive payments in real-time. The solution can be integrated with your existing ERP or business application, enabling instant realization of funds, automatic reconciliation and payment knockoff.

Why corporates use Blink?

Through Blink, our corporate customers are able to:

- Automate accounts receive and payable lifecycle
- Pay or get paid instantly via any bank
- Schedule payments
- Manage bulk and partial payments
- Simplify reconciliation of B2B payments
